HOSPITAL OPERATIONS BI

Dashboard 1: Hospital Overview (Executive Command Center)

[DARK ENTERPRISE MODE (DEFAULT)]
Architectural Layout Wireframe – Tableau Desktop 1600x900 Specification

1. Hospital Overview
2. Patient Flow
3. Department Analytics
4. Resource Utilization

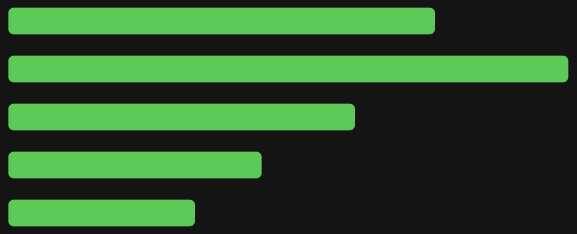
TOTAL ADMISSIONS	TOTAL DISCHARGES	AVERAGE LOS	READMIT RATE (CMS)	TOTAL PATIENT-DAYS
101,766	101,766	4.40 days	11.34%	447,362
10-Year Study Volume	Completed Stays	Median: 4.00 days	Surviving Cohort (100k)	Workload Delivery Proxy

Longitudinal Monthly Admissions vs Discharges (1999–2008)

Dual-line time series with period-over-period trendlines and throughput gap tracking

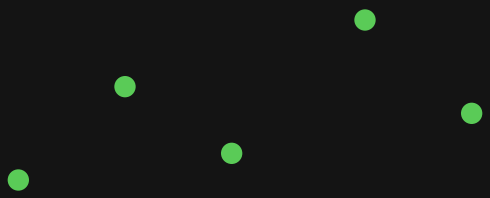
Department Volume Distribution

Ranked inpatient admissions across 15 standardized clinical specialties



30-Day Readmission Outcomes & Demographics

Donut breakdown (<30d, >30d, None) with age bracket stratification



SYSTEM STATUS

● Live Telemetry Ready

101,766 Clean Records
15 Active Departments

Developed by Ananya Biju

Dashboard 2: Patient Flow & Inpatient Throughput

[DARK ENTERPRISE MODE (DEFAULT)]

Architectural Layout Wireframe – Tableau Desktop 1600x900 Specification

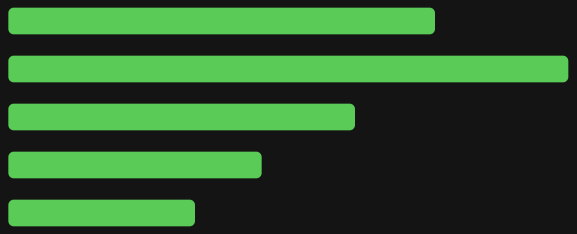
TOTAL ENCOUNTERS	EMERGENCY INTAKE	ROUTINE HOME EXIT	PROLONGED STAYS
101,766	53.07%	60.45%	7.15%
100% Inpatient Acuity	54,011 Emergent Cases	61,515 Routine Discharges	>9 Days Inpatient Care

Integrated Patient Flow Transition Funnel

Three-stage flow mapping: Admission Referral Source -> Clinical Specialty -> Discharge Disposition

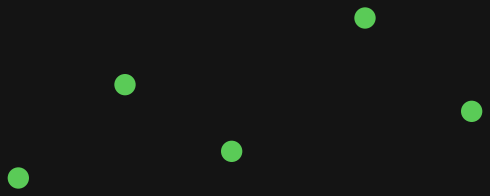
Length of Stay (LOS) Right-Skewed Histogram

Distribution of stay durations (1–14 days) with Mean (4.4d) and Median (4.0d) benchmark l



Temporal Admission Heatmap (Day of Week x Month)

Concentration matrix identifying weekly and seasonal admission surges



Aegis.dv

Dashboard 3: Department Analytics & Service Line Performance

[DARK ENTERPRISE MODE (DEFAULT)]
Architectural Layout Wireframe – Tableau Desktop 1600x900 Specification

1. Hospital Overview
2. Patient Flow
3. Department Analytics
4. Resource Utilization

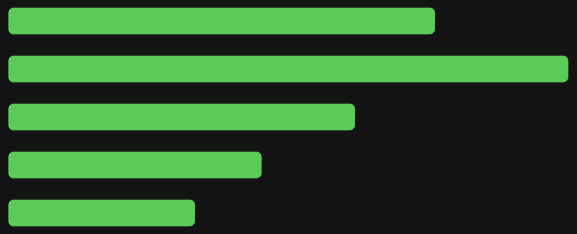
CLINICAL SERVICES	VOLUME LEADER	HIGHEST ACUITY	HOSPITAL BENCHMARK
15 Units	Internal Med	General Surgery	4.40 Days
Standardized Taxonomy	49.6% Total Patient Load	26.4 Clinical Intensity	Target ALOS Threshold

Department 4-Quadrant Strategic Portfolio (Volume vs Readmission Rate)

Scatter plot sized by Patient-Days; benchmark lines at Hospital Readmit Rate (11.34%) and Median Volume

Ranked Department Length of Stay (ALOS)

Horizontal bar comparison with sample size flag (p_Min_Sample_Size >= 30)



Clinical Intensity Index by Department

Weighted procedure, medication, diagnostic, and lab workload score

Dashboard 4: Resource Utilization & Facility Capacity Planning

[DARK ENTERPRISE MODE (DEFAULT)]

Architectural Layout Wireframe — Tableau Desktop 1600x900 Specification

■■ NOTICE: Synthetic reference data – not real hospital figures (Section 3 Policy Compliance).

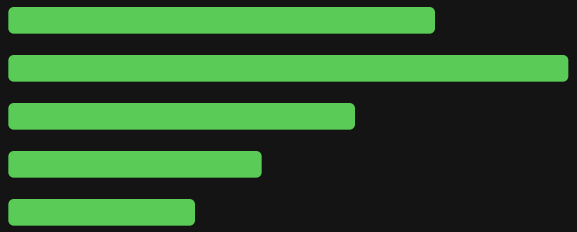
STAFFED BEDS	AVERAGE OCCUPANCY	NURSE-TO-PATIENT	DELIVERED CARE DAYS
650 Beds	78.4%	1 : 3.4	447,362
Licensed Inpatient Units	Target Range: 75%–90%	Daily Unit Average	Authentic Workload (Real)

Daily Bed Occupancy Rate Trend vs Threshold Bands

Time series featuring 75%–90% optimal operational zone and 90% critical bottleneck redline

Staffed vs Occupied Beds by Clinical Unit

Side-by-side capacity comparison across 10 inpatient nursing units



Nurse Staffing Level vs Patient Census Correlation

Daily on-duty nursing coverage plotted against active bed census
